This revision 7 June 2023

The following fleet list is updated from that published in H.W. Dick & S.A. Kentwell, *Far Eastern Fleets* (NAA, Geelong 1973) and revised in *Beancaker to Boxboat: Steamship Companies in Chinese Waters* (NAA, Melbourne, 1988), Chapter 3. The original fleet list of this elusive company could not have been compiled without the generous assistance of Professor E.K. Haviland (who wrote extensively on early steam navigation in China) and Mr R. Murray, during the 1930s the company's manager in Amoy and after the War in Hong Kong. The late T.M. Milne, author of 'Steam Vessels sold to Japan up to 1870' (1964) was also a generous correspondent. Annual reports of the Douglas S.S. Co. from 1883/84 to 1927/28 were obtained from the Jardine, Matheson & Co. archive at Cambridge University and from the Hong Kong Weekly Press. A full account of the long career of *Moura/Hai Hong/Mactan* by I. Farquhar & H. Dick was published in 'The Log', quarterly journal of the Nautical Association of Australia Inc. (February 1985). Revision of the fleet list has been greatly assisted by details at www.aberdeenships.com and www.clydeships.co.uk (Thos Wingate), Guildhall Library (voyage register cards), National Archive (BT389-14-204, 209-10), S. Rabson & Kevin

O'Donoghue, *P&O: A Fleet History* (WSS, 1988) (*Azof, Formosa*) and Ms Eve Wicks (*Haitan*, 1940).

When the history and fleet list was originally published, there were few identified photos of Douglas Lapraik ships, most of which were included with the list. Although these ships were part of the scene in Hong Kong and other Coast ports for ninety years, they seem not to have been much photographed, and most of what did exist in Hong Kong in 1941, including the company's own records, was lost in the course of the subsequent Japanese occupation. With serendipity and many years of forensic work on harbour views, we have now been able to achieve fairly good coverage, albeit of uneven quality.

The low resolution images uploaded here are for research and identification purposes only and sufficient to show the layout of the ships and the evolution of the company's unique style. Acknowledgement is given with each caption. Anyone seeking a high-resolution image should consult with the image source as listed.
