The notation 'UoB' indicates a photograph has been sourced from Historical Photographs of China, University of Bristol (www.hpcbristol.net).

This fleet list was originally published in H.W. Dick & S.A. Kentwell, *Beancaker to Boxboat: Steamship Companies in Chinese Waters*, Nautical Association of Australia Inc., Canberra (1988). It has been revised to incorporate further details from H.W. Dick & S.A. Kentwell, *Sold East: Traders, Tramps and Tugs of Chinese Waters*, Nautical Association of Australia Inc. Melbourne (1991) and updated in light of subsequent vessel histories and new information that has come to hand, including through the Board of Trade (BT 389) series on WWII requisitions at www.nationalarchives.gov.uk, the excellent on-line records of www.aberdeenships.com, www.clydeships.co.uk, www.miramarshipindex.nz, www.sunderlandships.com, www.teesbuiltships.co.uk and www.tynebuiltships.co.uk. For some dates and events, however, we have privileged other sources.

Since 1988 we have sought to locate images of each of the vessels. This has been a painstaking task because Jardine, Matheson & Co. themselves have no surviving consolidated pictorial archive of their pre-1945 fleet and in many cases it has been a matter of deducing from unidentified material. Identifications that we regard as unconfirmed are indicated by a question mark but it is possible that some 'confirmed' identifications will need to be corrected in light of further information.

Entries are ordered by years in the fleet, gross tonnage, year of build-month (if known), type (for early ships whether iron/steel screw/paddle steamer), engines (compound (C), triple (T), quadruple (Q) and/or (Exhaust) Steam Turbine/Motor) (2 twin-screw) and builder (engine maker if not the shipbuilder).

Apart from some of the China Coast S.N. Co. ships and the postwar 'Easterns', most ships carried names that romanised two Chinese characters, the second being 'Sang' or 'Shing' for coasters or 'Wo' for river steamers. Chinese observe no spacing between the characters and Jardines were never consistent, even as late as the 1950s, as to whether to romanise them as one or two words and whether to hyphenate. Reporting of the names was also erratic. We have applied the romanisation according to Lloyd's Register.

The illustrations are taken from our two books mentioned above, our own collections, Jardine, Matheson & Co. Ltd, or as otherwise acknowledged in the captions. An asterisk next to the noted source of a photograph indicates that a hard copy, printed off the original negative, is owned by one or both of the authors. Copyright, including by third parties, is claimed on certain of the photographs included in this list. The photographs therefore may not necessarily be available for duplication or publication.

We are grateful to Jardine, Matheson & Co. Ltd for their encouragement and support in updating and illustrating this list, including access to the unpublished manuscript by Colin Hardy, 'Indo-China Steam Navigation Company'.

Our material is made available in the public domain as a research resource. We trust that anyone making use of this information will make appropriate citation. The authors would welcome any advice on errors, omissions or missing images.
