INTRODUCTION

This is the third part of **our list of Pearl River ferries**, covering vessels operating in the period **1945 to 1996**. This period featured a short postwar revival in services to ports in Kwangtung Province, until the Communist Revolution largely ended services from Hong Kong to Chinese ports. On the other hand, ferry services from Hong Kong to Macao showed an accelerating growth, until the total changeover in the latter part of the 20th century to smaller hydrofoils, jetfoils, catamarans and trimarans, which we have not ventured to cover.

Geographically our list covers trades between Hong Kong and Canton (now known as Guangzhou) and from both cities to Macao, locations in Kwangtung (Guangdong) province such as Wuchow (Wuzhou) and Nanning in the West River and Kongmoon (Jiangmen) and Sanbu in the Yinchou Hu creek west of Macao.

Separate lists at oldchinaships.com cover the pioneering **Hong Kong, Canton & Macao Steamboat Co. (HCMSC)**, vessels operating along the coast to the **near north**, such as to Swatow (Shantou), Amoy (Xiamen) and Shanwei; vessels operating **southward** to Kwang Chow Wan (Zhanjiang) and beyond; and passenger vessels operated by the **Guangzhou Maritime Bureau** which, with the exception of *Xing Hu*, *Tian Hu*, *Xi Jiang* and *Tan Jiang* included near the end (1984) of this list, did not operate passenger shipping to Hong Kong.

Vessels are ranked chronologically, and alphabetically when several ships commenced service in the same year. All locations are Hong Kong unless otherwise stated. Years listed represent the period the vessel was in river service or available for such service. Dimensions shown are in feet. [Blue text indicates ships that also served in the joint HCMSC-Swire service \(see separate list for full details including illustrations\).](#)

The Japanese surrender in August 1945 resulted in a gradual recovery in both Hong Kong and Canton,

the economies of which had been severely affected by the war. The effect on the ferries was even more devastating. Only very few ships had survived, and even those that did so needed reconstruction and faced issues such as diversion to military use, and residual mines in the Pearl River, which for example, sank the ferry *Miss Orient* (1085/34) six miles from Canton in March 1949 with the loss of 29 lives. Certainly, vessels were quickly repaired and services resumed, including to the West River, but even by October 1949 when People's Republic was proclaimed, ferry fleets had not been fully restored to prewar levels. The following year the PRC ended virtually all direct ferry services from Hong Kong to Chinese Pearl River ports.

But there remained the destination of the nearby Portuguese colony of Macao, hitherto a secondary destination for the ferries compared with Canton. With its liberal gambling, associated pawnshop and opium (which technically became illegal in 1947) laws that colony had developed from the 19th century as a tourist town for mainland Chinese and Hongkongers. The population grew from about 74,000 in 1910 to about 193,000 in 1924, with numbers then gradually declining. However, once the Sino-Japanese war had begun, the population quadrupled to 700,000 in short space of time as tens of thousands of refugees flooded into neutral Macao. During the Pacific phase of World War II (1941-45), refugees further increased its wealthy population.

Postwar Macao continued to thrive. The casinos, illegal in Hong Kong and China but encouraged by the authorities in Macao, gained in importance as a recreational outlet for increasingly affluent Hong Kongers and tourists from abroad. After 1950, Macao also became a transit point for cargo and passengers to China who either accessed parts of the PRC west of Canton through the overland border, or trans-shipped at Macao to smaller craft. Both elements contributed to the demand for ferry travel, which at that time was the only means of direct access from Hong Kong.

The Macao gambling monopolies had been held and developed successively by several notable individuals. Lo Kau (1848-1907), who by the 1870s had achieved leading positions in the pork, opium and banking/pawnshop and lottery businesses, was granted the exclusive fantan license in the 1880s. We have not uncovered any direct links between Lo and ferry companies, although they probably existed.

The second Macao gambling supremo was Kou Ho-neng (1879-1955), who in 1913 obtained the opium monopoly license, by 1915 had won the fantan concession and in 1917 opened the Fu Hang Money Exchange and the Tak Seng (Shing?) On Pawnshop, the biggest such enterprise in the city located in the vicinity of the gambling houses. The same year he founded in Hong Kong the Tung On Steamship Company, which soon operated several ferries to destinations such as Canton and Macao and between both ports, and from the 1920s the large *Charles Hardouin* and *Paul Beau*. In 1930 the Macau government granted the first comprehensive gambling concession, a monopoly, to the Kou-controlled Lun Lun Company, which was able to operate a wide variety of games of chance. In Kou's time, operation of the hotel, gambling, opium, prostitution and ferry services became interwoven and it became possible to buy a comprehensive package ticket to Macao, something that is still available (without opium) today. In March 1935 the newer *Sai On* and *Tung On* were acquired by Tung On S.S., replacing *Charles Hardouin* and *Paul Beau* on the Hong Kong-Canton route, but the Lun Lun company fell into financial difficulties and in 1937 was restructured as the Tai Hing company with an

emerging heavyweight Fu Tak Lam (1895-1960) as the main shareholder.

Kou Ho-neng (Fundacao Macau & k.sina.com.cn).

Fu Tak Lam, life-long opium smoker (K.sina.com.cn).

Fu had bid unsuccessfully for the 1930 gaming monopoly, then developed an underground casino in Shenzhen, said to be the largest in China and significantly eating into the profits of those in Macao until being closed down by the Nationalists after the war with Japan had commenced in mid-1937. However, with his new financial strength, Fu was able to win the 1937 Macao bid jointly with Kou. He then established Tai Hing S.S. Co. Ltd, which in December 1937 acquired *Charles Hardouin* and *Paul Beau* and placed them on the Macao route as *Kau Tung* and *Macao* (Chinese name *Hou Kong*) respectively. A third vessel was the old *Tin Yat*, which perhaps would have operated Canton-Macao or as a reserve. All three ships were lost during the war when Pearl River ferry services were under Japanese administration.

At the beginning of 1946 the only passenger ships remaining still operation between Hong Kong and Macao were the independent *Kwong Fook Cheong* and *Kwong Sai*. Nevertheless, Fu's property and other investments in Macao had been profitable through the war and in 1946 he is said to have acquired several German-pattern 6-cylinder diesel engines manufactured in Hong Kong for the Japanese occupiers by the Hip Tung Wo Engine & Manufacturing Co. In 1946 he established Tak Kee Shipping & Trading Co. Ltd, which took delivery from Wing On Shing at Cheung Sha Wan, Kowloon of the new 430-grt wooden-hulled motorship *Hudson* 香江 for operating to Canton. At the same yard he then had built the luxurious, triple-screw 1330-grt *Tai Loy* 大来 designed with three screws to take three of the engines and the ship entered its designed Macao service in January 1951. The ship's name used the same prestigious *hanzi* as the prewar hong name of the now defunct Dollar Line, while the funnel colours were the same as the major Portuguese company Companhia Colonial, which occasionally ran passenger ships from Portugal to Macao. *Tai Loy* ran alongside the reconditioned *Lee Hong*, which had been acquired in 1949. To serve his ships, Fu redeveloped Pier 16 of Macau's inner harbor. In Hong Kong the terminus was Ping On Wharf and later Po Tak Wharf.

The closure of most ferry services to the mainland in 1950 and the evacuation to Hong Kong of surviving Yangtse ships, especially those of the Ming Sung company, meant that owners sought to redeploy some of these ships on the Hong Kong-Macao route, which led to intense competition

Early 1950s view of Sheung Wan waterfront. From left the white hulled ferries can be identified as LEE HONG (at the former HCMSC Wharf), TAI LOY (at Ping On Wharf), KWONG SAI and KWONG TUNG (at the former British Canton Line Wharf) and KWONG FOOK CHEONG (at Hoi On Wharf) (<https://gwulo.com/media/30606>).

among a mixed assortment of vessels. At first large Ming Sung vessels such as the *Yu Men* were involved. Eddie Wong's new Ta Hing Co. was prominent with smaller ships, chartering the former Shanghai tug/tender *Merry Moller* (382/27) before introducing the little *Wing Hing* and then the smart converted minesweeper *Cheung Hing* (ex HMAS *Bendigo* – 781/41). He attempted to buy a further two such minesweepers but was prevented by the authorities in Australia. Tsun Nin Chau (CBE) ran the ageing *Kwong Sai* (1309/02) and *Kwong Tung* (1218/04) and in May 1951 bought CNC's *Fatshan*. The competition saw fares dropping to as little as \$1 on the *Kwong Tung* and \$2 for other vessels (\$3 on the new *Tai Loy*) in the period 1952-53 but by the end of the decade only the *Tai Loy* (1950), *Fatshan* (1933) and the renovated *Takshing* (1924 ex *Sai On*) remained in service, operating from 1958 with coordinated schedules and more expensive ticketing. The main finger piers used by Macao ferries in the Hong Kong island waterfront at Sheung Wan were redeveloped in the late-1950s into the large new Hong Kong Macao Ferry Wharf.

LEE HONG and TAKSHING with celebratory mast-top trees at the new Hong Kong Macao Ferry Wharf (J. Feltham).

Hong Kong Macao Ferry Wharf c.1960

(<https://i.pinimg.com/originals/10/6f/03/106f0320fc4ccd61b8b44aa6f1749e31.jpg>).

Hong Kong Macao Ferry Wharf in 1970, mini-buses having been legalised the previous year (HKPL). The wharf and a Hydrofoil Terminal facing the west terminal were demolished in 1981 to make way for the Shun Tak Centre.

Following Fu's demise in 1960, the exclusive gambling concession was put out to tender in 1962 and won by Stanley Ho (1921-2020), a great-nephew of Sir Robert Ho Tung, the major shareholder of the prewar HCMSC with extensive real estate holdings in Hong Kong and Macao. Ho had moved to Macao during the war and married into Macanese society, his father-in-law holding a prominent position in the hospitality business. According to Jorge Godinho, referenced by Cortés and Vilela, though his trading agency *Agência Comercial Progresso* Ho developed excellent relations with the PRC in the 1950s using Portuguese import licenses to validate cargo and divert the destination of goods from

Dili, East Timor to ports in the People's Republic of China. Ho's *Sociedade de Turismo e Diversões de Macau, S.A. (SDTM)*, backed financially by Henry Fok, Teddy Yip and Yip Hon, succeeded in being chosen by the Portuguese governor of Macao, in large part because of this good relationship with the PRC. The exclusive concession continued until 2002 when finally, five more operators were allowed to receive licences.

The late Stanley Ho, Chairman of the Shun Tak Group and Director of Shun Tak Shg. Co. Ltd, chaired by Henry Fok (L: SCMP 1962, R: Daily Telegraph).

SDTM took immediate action to improve the ferry services. In 1962 it registered in Hong Kong the Shun Tak Shg Co. Ltd, which purchased a veteran former British Rail steamer, introduced in 1964 as *Macau* and dwarfing the other vessels on the run. The ship was lavishly refitted, carefully maintained and introduced night club-type entertainment including a striptease show. Simultaneously through the subsidiary Far East Hydrofoil Co., Shun Tak became one of two firms to introduce hydrofoils, thereby cutting passage time to little more than an hour – the other firm was the Hong Kong Macao Hydrofoil Co. This new competition may well have helped to bring about the merger in August 1968 of the other three single ship operators into a new concern known as Tai Tak Hing Co. Ltd, which thereafter ran a joint service with Shun Tak, Tai Tak Hing reviving the old HCMSC 'Shan' (mountain) nomenclatures.

Shun Tak also operated the Panamanian-flag cargo ship MACDILI, seen here in 1977 at Macau wharf unusually with a "ham" shortwave radio antenna (C. Gee).

The early 1970s saw rapid change. Several ferries became casualties of typhoon 'Rose' in August 1971: *Fatshan* capsized with heavy loss of life, the decommissioned *Lee Hong* also sank, and *Macau* was blown ashore. Although refloated and considered for reconditioning, she was so badly damaged that Shun Tak were forced to buy the venerable Japanese passenger ferry *Nishiki Maru*, 'Queen of the Inland Sea', renamed *Wah Shan* as a stop-gap replacement. In the following year Shun Tak and Tai Tak Hing took delivery from Niigata Shipyard of two of a series of modern conventional ferries, *Nam Shan* and *Tai Shan*. A third sister for Shun Tak, the *Lo Shan*, was added at the end of 1973. A further two vessels of the class, probably initially ordered for the Macao route, were delivered by Niigata Shipyard in 1974 to the Cuban Government (yard nos 1276 and 1306). Last of the older era ferries to be disposed of were the now outsized *Chung Shan* in 1978 and the 1934-built *Wah Shan* in 1979.

In 1974 Shun Tak was listed in Hong Kong as Shun Tak Holdings and has since gone from strength to strength featuring property investments as well as shipping ones: Conwick Investment Ltd; Far East Hydrofoil Company Ltd; Hong Kong Macao Hydrofoil Company Ltd; Sunrise Field Ltd; Tai Tak Hing Shipping Company Ltd (this was the company, then independent, that owned the ferry *Fatshan*); Wealth Trump Ltd; Shun Tak-China Travel Macau Ferries Ltd (formerly known as Hong Kong-Macao New World First Ferry Services (Macao) Ltd); and Companhia de Serviços de Ferry STCT (Macao) (formerly known as New Ferry— Transporte Marítimo de Passageiros (Macao)).

The introduction in 1984-5 by Hong Kong Hi-Speed Ferries Ltd of two fast 650-passenger launches that could do the trip in 1.5 hours as well as the increasing numbers of Boeing Jetfoils relegated the slower (2.5 hour) ferries to late-night and weekend sailings. The last of the conventional Macao route ferries, *Lo Shan*, was withdrawn in May 1990 but evidently remained laid up at Hong Kong for the next 25 years.

Passenger shipping between Hong Kong to Macao is currently undertaken by Shun Tak and other companies primarily using Austal catamarans and US-made Pequot River Shipworks Tri-cats. The opening of Macau International Airport in November 1995 enables direct international air access. Also in October 2018 the 55-kilometre Hong Kong–Zhuhai–Macao Bridge (HZMB), stated to be both the world's longest sea crossing and longest open-sea fixed link was opened, enabling some, though restricted, vehicular traffic.

WEN SHING 文星 (1946?-51) 417/34 143.0(135.0)x23.0 M 1400bhp 14.92k

Built by Kiangnan D. & E. Co. Ltd, Shanghai (#678) for Chinese Maritime Customs as **WEN SHING**. 1937 captured by Japan on Yangtze and commissioned into IJN as **BUNSEI** (same characters), used as tender to minesweepers but Fukui reports no longer operational by 1941. 1949 as **WEN SHING** operating passenger service Hong Kong-Sanbu (beyond Jiangmen). 1951 sold to Ng Ping, Hong Kong, rebuilt r. **GOLDEN CITY** 金城 (Cantonese **GAM SENG**, mandarin **JIN CHENG**). 1954 sold to Oversea Navigation Co., Ltd., Hong Kong. 1958 sold to Tai Shing Shipping Co., Ltd., Hong Kong. 1960 sold to Yau Wing Co., Ltd., Hong Kong. 1961 sold to Au Ming Sueng, Taiwan, NFI. 1992 RLR.

GOLDEN CITY was built as **WEN SHING** (**WEN HSING**) 文星 for use on Yangtze by Chinese Maritime Customs (Richard Wright drawing).

WEN HSING (I.) at Ping On Wharf, Hong Kong in 1949 preparing for a voyage to Sanbu, upstream from Jiangmen, Kwangtung Province. Gun still mounted, tip of bow cut off, presumably to facilitate turning in Yinchou Hu creek

<https://www.shipsnostalgia.com/media/lee-hong.422419/>.

GOLDEN CITY with large doored opening beneath boat (Tom Rayner).

Still with flattened bow, on the Pearl River in PRC service (*China Pictorial* 9/61).

Snapshot, probably taken at the Shameen in central Guangzhou, showing GOLDEN CITY (r.) and a 3000 grt 'MEN' class (l.) (Internet).

HUDSON/HONGKONG (HONG KWONG) 香江 (1946-50) 430/46 (w.s.s.) 140.4x29.7', M (believed to be 6cy by Hip Tung Luo Engine & Mfg, HK)

Built by Wing On Shing, Cheung Sha Wan, Kowloon for Tak Kee Shg & Tdg Co. Ltd, Hong Kong as HUDSON, subsequently advertised as operating Hong Kong-Canton for these owners as HONGKONG (HONG KWONG) 香江, presumably a Chinese rendition of 'Hudson'. 10/7/50 reg. at Hong Kong as

WHITESON (ex-HUDSON), employment not known. 6/52 sold to Tong Lian Liong, Singapore for trading to Sumatra but 6/7/52 foundered in 17.00N 114.00E c.70nm N. of Macclesfield Bank o/v Hong Kong-Singapore in ballast.

MERRY MOLLER (1946-49) 382/26 (141.0x 30.1', T3cy/62nhp by builders)
Built by Kiangnan D. & E. Co. Ltd, Shanghai (#502) for Robert Dollar Co. Inc., San Francisco as DOLLAR. 1939 sold to Mollers' Towages Ltd., Shanghai r. MERRY MOLLER 8/12/41 captured by Japanese forces at Shanghai. 1947 re-reg at Hong Kong for E.B. Moller as MERRY MOLLER. 11/46-5/49 operating ferry service Hong Kong-Macao for Ta Hing Co. (HK) Ltd. 5/49 t/f to Mollers' Towages Ltd. 7/50 r. CARMEN MOLLER. 6/52 r. CASTLE HILL. 2/56 sold for breaking.

MERRY MOLLER in former colours as DOLLAR (Steamboat Bill).

MERRY MOLLER at Shanghai c. 1941 (*Sekai Shosen Yoran* P.297).

WUSUEH 武穴 (1946-50) 3009/31-5 (295.0 x 46.1', 2-M6cy/531nhp/10k Sulzer Bros A.G. Ludwigshafen)

Built by Taikoo D.Y. & Eng. Co. Ltd, Hong Kong (#253) for and 11/5 del. to CNC for Yangtse River, mid-6/31 in service. 1/1/36 stranded in snowstorm above Chinkiang, 26/2 refloated. 19/4/41 Hong Kong for Singapore (25/4). 13/11/41 at Singapore req. by RN for use as hospital ship. 4/3/42 arr. Colombo via Batavia, thence Bombay (9/3). 19/11 Bombay for Calcutta (7/12/42), thence in service Calcutta-Chittagong. 20/3-3/12/43 refit at Calcutta. From 1/44 also to Cox's Bazaar/Akyab. 2/4/45 arr. Calcutta for refit, 13/12 sailed for Singapore (20/12). 1/46 repat. voyage to Belawan. 4/46 at Singapore released from hospital service. 27/4 Singapore for Hong Kong (4/5). 12/8/46 redel. to CNC and placed in Hong Kong-Canton trade (later to Macao). 9/5/50 damaged in bow-on collision with *Nam Guan* (250t) outside Macao. 8/50 sold to R.N. and conv. in Hong Kong to headquarters and communications vessel HMS LADYBIRD for use in Pusan and Sasebo. 5/53 sold back to CNC but 6/53 sold to Wing Tak for breaking up at Kowloon [BT 389/32/177].

WUSUEH on Pearl River service (Don Brotchie, HMS Falcon website).

HSIN KONG SO (1947-48) 1037/10 (2-sc. 1 stl deck & awning deck, 180.4 x 32.0', T4cy/171nhp Miller & Macafie Ltd, Glasgow)_

Built by Napier & Miller, Glasgow for Boscowitz S.S. Co. Ltd (J. Barnsley mgr), Victoria (BC) as VENTURE. 1926 owners restyled Union S.S. Co. of British Columbia Ltd (E.H. Beazley mgr). 1946 sold to Tai Chong Cheang S.S. Co., Shanghai r. HSIN KONG SO. 10/47 reg. owners Wheelock Marden & Co. Ltd, Hong Kong for Tai On Cheung SS. Co., Ltd, Hong Kong, service Hong Kong-Macao. 5/2/48 beached in Southwest Bay, Lantao Island after fire and boiler explosion on voyage Macao-Hong Kong, became CTL. 3/48 sold to Chinese interests, probably for breaking up.

HSIN KONG SO in earlier years in Canada as VENTURE. (Walter E. Frost, Vancouver City Archives).

WING HING (1947-49) 563/46 (150.58 x 27.08', T3cy)

Built by A. Hall & Co. Ltd, Aberdeen for MOWT (Straits S.S. Co. Ltd, Singapore) as EMPIRE MAYDREAM. 3/47 reg. at Hong Kong for Ta Hing Co. (HK) Ltd (Moller Line [UK] Ltd), Hong Kong r. WING HING and placed in service HK-Macao. Late 1949 mgrs Wallem & Co. Ltd, Hong Kong, operating to Kwanchowwan and Swatow and Amoy. 14/1/50 while anchored off Swatow following discharge of cargo, damaged by shrapnel from two 250lb bombs from Nationalist bombers. 12/2/50 with around 100 passengers, 43 Chinese crew and 3 European officers, stranded in heavy weather on Chilang Point (90 m. N. of Hong Kong) and damaged by fire on voyage Hong Kong-Amoy. Passengers taken off by *City of Kimberley*. CTL.

WING HING wrecked at Chilang Point. Illustration shows forward superstructure extended aft to asextra accommodation for passengers, forward derrick removed (China Mail, 13/2/50).

CHEUNG HING 祥興 (1948-50) 781/41 (186 x 31', 2-sc-T3cy/1750ihp/15k)

Built by Cockatoo D. & E. Co. Ltd, Sydney for RAN as corvette/minesweeper HMAS BENDIGO (J187). Battle honours New Guinea 1942-44 and Okinawa 1945. 1945-46 21st Minesweeping Flotilla, Hong Kong and Amoy. 27/9/46 paid off at Sydney. 5/47 sold to Ta Hing Co. (Hong Kong) Ltd r. CHEUNG HING. 17/7/47 sailed for Hong Kong for conversion to passenger ferry for Hong Kong-Macao run. 30/3/48 m/g for \$0.4m. to Central Trust of China, then 29/11/48 re-m/g \$0.4m to HKSB. 5/3/50 reg. Hong Kong for Ta Hing (Wallem & Co. Ltd mgrs), withdrawn from HK-Macao line, t/f to Swatow/Amoy run. 1/5/50 attacked by Nat. gunboat. 5/6/50 attacked by Nationalist warship off

Amoy on return voyage to Hong Kong (arrived 6/5 with 8 passengers dead). 3-4/7/50 under fire from shore batteries. 9/12/50 mortgage discharged. 12/50 sold to A.H. Carroll, Hong Kong for trading between Hong Kong and Amoy. 1953 sold to People's Republic of China Navy, commissioned and rearmed with Soviet weaponry as LOYANG (LUOYANG), said to have been personally inspected three times by Chairman Mao Zedong. 1988 removed from Janes.

Ming Sung Canadian-built ferries (1948-51, 1948-53, 1949-51)

Seven vessels were designed for the Yangtse but, owing to the Chinese civil war, delivered under the Canadian flag to Hong Kong and subsequently operated in the Pearl River delta, including Hong Kong, Macao and Canton, until their crews hoisted the PRC flag in 1950 and 1951 and proceeded to Canton. The *Montreal Gazette* (20 Aug. 1953) reported that after being laid up for about a year, the seven

ships had been converted for cargo carriage. The three 3,000-grt steamers were carrying strategic goods and military materials from Guangzhou to Beihai in Guangxi Province and ports on Hainan Island, while the four 900-grt motorships were operating between Guangzhou and Zhanjiang, then known as Kwangchowwan (Guangzhouwan), formerly Fort Bayard on the Guangdong coast, and also ferrying embargoed Eastern bloc and other cargoes trans-shipped at La Sha Wei Island (Garbage Dump Island) 25 miles west of Hong Kong. Two more 900-grt sisters operated on the Yangtse. Some of these vessels were still afloat in the 1980s (see colour photos below). The outstanding mortgages on the ships were not repaid to the Canadian Government until Canada recognized the PRC, the repayment agreement being dated 4 June 1973.

HU MEN/ FU MEN 虎門 (1949-50) 3079/48-12 (272.9 x 50.0', 4 steam turbines DR geared to 2 shafts, De Laval Steam Turbine Co., Trenton N.J.)
Built by G.T. Davie & Sons, Lauzon. 2/2/49 departed New York, 15/3 arrived Hong Kong via Honolulu. 13/10/53 taken to Canton. 1966 or 1967 r. **HONG WEI 2**. NFI.
