INTRODUCTION

Compania Maritima (1895-1988) has good claim to have been in its time the most important shipping firm in the Philippines. When formed in 1895 as a combination of various Spanish and British (Scottish) shipping interests, it held a near-monopoly of Philippine interisland shipping. After struggling from 1898 during the early years of the American occupation, its fortunes were restored from the late 1920s under the management of Fernandez Hermanos. That second fine fleet was destroyed by the Japanese invasion of 1941/42. From 1946 and Philippine independence, a fleet was reconstituted and gradually modernized, latterly with the focus on deepsea lines. In the late 1980s, just short of its centenary, Maritima succumbed to the container revolution and competition from the shrinking number of aggressive and well-capitalised firms. Its name along with that of Fernandez Hermanos may still be seen engraved in the stonework of its former head office in Binondo at 109 Juan Luna Street (on the corner with Dasmariñas Street) in what used to be Manila's CBD. In Cebu the shell of the neoclassical Maritima building still stands on the waterfront as a striking monument.

Maritima's origins may be traced back to 1860 when the young Scotsman Neil Macleod (b. 26 May 1838 at Tarbert on the Hebridean isle of Harris) arrived in Manila to take up appointment as clerk in the British merchant house of Smith, Bell & Co. His younger brother Alexander Stewart Macleod followed in 1864 – a third brother would have joined them in 1865 but he died of heat stroke in the Red Sea. Turnover was high among foreign business firms in Manila because young men went out to seek their fortune and, if they survived the tropical rigours and had enough ability and energy to succeed, then returned home to marry and invest their fortune in a more comfortable life. Thus in 1868 at the age of just thirty Neil became local manager of Smith Bell. Two years later he resigned

and with colleague Cornelius Robert Blair Pickford formed the partnership of Macleod, Pickford & Co. [nigelgooding.co.uk]. Macleod resided in Manila, Pickford in Cebu. Alexander soon became a third party. When Pickford returned to Smith Bell around 1878, Macleod, Pickford & Co. became the family business of Macleod & Co. first cousins Anthony Murray, James Fleming and John T. were then brought in, joined in 1889 by William Stewart ('Under Four Flags', c.1971). Macleod & Co. became the leading interisland shipowner while trading in hemp and buying extensive landed and urban property. By 1913 W.S. (b. 1869, London) was the sole surviving partner and the company had become a local subsidiary of International Harvester of Chicago. In October 1919 he and his family emigrated to the United States where he died in April 1935.

In 1890 Macleod & Co. split. Alexander, now Don Alejandro, with his Spanish wife Mercedes Martinez took half the shipping fleet and joined with Spanish-born Basque Don Zoilo Ybañez de Aldecoa (1834-95) in the commission and agency house of Aldecoa y Cia, which thereby became substantial shipowners. Around the same time, in July 1890, Don Neil, who remained in charge of Macleod & Co., renounced his British citizenship to become a Spanish citizen – he had married Scottish-born Harriet but had no sons. These manoeuvres made both firms eligible under Spanish law to bid for forthcoming mail interisland contracts with the colonial government.

Excerpt of Pasig panorama from Intramuros towards Binondo, period 1890-94 (pre-Maritima). Anti-clockwise from left: Larrinaga's white-hulled CHURRUCA/GRAVINA (1878), (outer) Aldecoa-Macleod (unknown), ?TAAL (Roxas, 1887), (outside) unknown funnel, ?ESPANA (Roxas-Reyes, 1881), (outer) small Ynchausti steamer (?BAUAN, 1885), (opp.) large URANUS (Aldecoa-Macleod, 1889) and (distant) small local Roxas-Reyes steamer (Calif. State Library/John Tewell).

Under deeds signed in April 1894, with effect from 23 January 1895 the main interisland shipping interests consolidated a virtual monopoly under the style of Compania Maritima (Maritime Company) with registration in Manila. In the first instance it reunited the Macleod interests with Aldecoa but it also brought in the interisland and coastal interests (excluding Manila Bay and Laguna de Bay) of Ynchausti y Cia and the mingled Roxas-Reyes families along with Genato, Goyonechea, Munoz, Tambunting, and Tuason. The companies themselves did not merge but the principals brought in their ships along with other parties who were shareholders in those vessels. The value of the 23 vessels was assessed as P1.5 million but in all P2.5 million was subscribed in 5,000 transferable P500 shares. The statutes were to have effect for twenty years. The board as managing agents consisted of Z.Y. de Aldecoa, Alejandro (sic) Macleod, F.L. Roxas, Rafael Reyes and Francisco

Reyes for an initial term of eight years (to 1903). They were to receive 2.5% of gross revenue divided equally among them. John (Juan) T. Macleod was added on 10 Sept. 1895 as general administrator and Don Zoilo died the following month.

Operations commenced in the first week of February 1895 with vessels at first continuing in their usual trade but advertised under the more impressive banner of 'Vapores de la Compania Maritima, Sociedad Anónima'. In March 1895 the interisland feeders of Larrinaga were also brought in, represented by Echeita & Portuondo, being the ships *Churruca* and *Gravina* (both 1878) and the somewhat larger *Elcano* (1881). Only the fleet of venerable Cia General de Tabacos de Filipinas (Tabacalera) remained outside the monopoly along with a few Chinese merchants with one or two ships.

The rearrangement of interests was accommodated on 22 February 1897 when the board was spilled by a 4:2 vote and a new board was appointed of Messrs Aldecoa & Co., Macleod & Co. (for Neil Macleod), Echeita & Portuondo, Ynchausti & Co. and Don Juan Macleod as Manager. F.L. Roxas, Rafael Reyes and Francisco Reyes were thereby sidelined to the benefit of the Macleod, Echeita & Portuondo and Ynchausti interests. In 1904 the claim of the Roxas and Reyes families for compensation for lost revenue (0.5% each 1897-1902) would be rejected by the Supreme Court (GR #1133, 29/3/04).

Four CM steamers (exc. foreground) moored both sides of Pasig, looking upstream c.1900 (coll. John Tewell).

The main incentive for the amalgamation of interests into Compania Maritima had been to win the subsidised mail contracts from the colonial government, which purpose was achieved. From 1 January 1897, CM's fleet of 21 vessels served the following lines according to the official Guia ('Guide') 1898:

Contract Mail Lines (fortnightly from Manila on Saturdays)

Interisland

North Luzon: Subic, Olongapo, Bolinao, San Fernando, Salomague, Aparri

South Luzon: Batangas, Calapan, Boac, Laguimanoc, Pasacao, S. Pascual, Palanoc, Donsol, Sorsogon, Legaspi, Virac, Tabaco

Southeast: Romblon, Capiz, Iloilo, Dapitan, Lindagan, Dapitan, Dumaguete, Cebu (alt. Romblon, Cebu, Ormoc, Catbalogan, Tacloban, Cabalian, Surigao, Camiguin, Misamis, Iligan)

South: Culion, Cuyo, Puerto Princesa, Punta Separacion, Marangas, Balabac, Jolo, Basilan, Zamboanga, Tukuran, Cotabato (alt. Iloilo, Santa Maria, Zamboanga, Basilan, Jolo, Siassi, Tataan, Bongao, Jolo, Parang, Cotabato, Lebak, Glan, Matti, Davao)

External

(4-weekly): Singapore (connection with French mail, Messageries Maritimes)

(bi-monthly): Yap (W. Carolinas), San Luis de Apra (Marianas), Ponape (E. Carolinas)

No sooner had the interisland shipping monopoly been consolidated than it fell apart. The first blow came in November 1897 when a severe typhoon caused the loss of the small steamers *Chispa* and *Taal* and the stranding of the larger *Aeolus*. Accordingly, the dividend declared in March 1898 for the preceding year had to be reduced to 4% (SFP, 26/3/98). Meanwhile, nationalist leaders had declared independence from Spain, leading to prompt efforts at suppression. Before the armed conflict had been determined either way, in May 1898 came the American occupation and more determined efforts to suppress the nationalist uprising. The newest ship, *Saturnus* (1893), was lost on the NW coast of Luzon during the fighting, then in September 1899 *Espana* became a casualty at the entrance to Manila Bay while trying to refloat the American cable ship *Hooker*. All these events disrupted scheduled sailings. Even though the ships were transferred to the American flag, the new American administration did not look kindly upon the perceived 'foreign' monopoly and suspended the contractual network. U.S. Army transports were deployed to maintain trunk services, supplemented by chartered steamers, including CM's *Elcano* and *Romulus*. New competitors also brought in ships and sailings became *ad hoc*.

Internal board politics were also disruptive. The once vigorous Macleods were now elderly and had financial troubles. Alejandro Macleod's firm Aldecoa & Co. went into liquidation at the end of 1906 and in July 1907 he himself took refuge in Macao from his creditors, most notably the Hongkong & Shanghai Bank. The question arose as to who would manage Maritima in the longer term. In 1904 Manuel M. Rincon took over as Managing Director from John T. Macleod, who moved to Munoz & Cia and then set up on his own account as 'exchange, share and real estate broker'. Then about 1907 the British merchant house Smith, Bell & Co. took over as General Managers (they were also agents for China-Manila S.S. Co. Ltd and Jardine's Indo-China S.N. Co. Ltd).

Meanwhile, in March 1905 the American Government of the Philippines had passed Act 1310 to encourage the coastwise trade and, specifically, to secure the carriage of mails, passengers and government freight at 'reasonable uniform rates' and with good safety standard. Unlike the situation in 1895 when the Spanish colonial government had, like the Dutch colonial government in the then Netherlands Indies, called tenders for an entire scheduled network, the American government called tenders by route, with the result that in August 1906 contracts were awarded for eleven common carriers routes distributed among various firms. This process had given incentive for the Ynchausti (later Elizalde) interest to split off from Maritima and secure routes #1 (*Vizcaya*), #3 (*Venus*), #6 (*Panay ex F. Pleguezuelo*) along with the steamers *Sorsogon* (ex *Antonio Macleod*) and *Elcano*, in effect halving the size of the Maritima fleet. Maritima secured routes #5 (*Brutus*), #7 (*Francisco Reyes*) and #9 (*Romulus*, later *Neil Macleod*) and #11 (*N.S. del Carmen*). After Smith, Bell & Co. had proceeded in 1910/11 to sell *Aeolus*, *Bolinao*, *Butuan* and *Francisco Reyes*, the once large Maritima fleet was reduced to a motley one of just five ships: *Belgika*, *Brutus* (lost June 1912), *N.S. del Carmen*, *Neil Macleod* and *Romulus* plus the steam tender *Carmen*.

Matters came to a head at the annual shareholders' meeting in late February 1912 (MT, 1/3/12). New directors were appointed: Rafael Reyes, William MacLeod, Mariano Veloso and del Rosario. A dividend was foregone in order to acquire a new steamer. Smith Bell resigned as General Managers and Fernandez Hermanos, who had consolidated a significant holding, replaced them from early March. The brothers Jose, Ramon and Vicente, Fernandez were three of the eleven children of a Manila industrialist and had learned the shipping business. Jose had worked for Maritima as chief shipping clerk and Ramon (b. 1878 at Manila), a British-trained electrical engineer, as Superintendent Engineer. Along with other mercantile activities, from 1905 they had operated a small fleet of their own, *Fernandez Hermanos* and *Islas Filipinas*, between Manila and Davao. In June 1913 in their own name they acquired NDL's smart *Nuen Tung* (1900) to become Maritima's flagship *Cebu* and gradually restored Maritima to a sound footing. During the 1920s by astute secondhand purchases and thorough refits of the better ships they re-established Maritima as the premier interisland shipping company. Jose served as President while Vice President Ramon pursued a political career as Mayor of Manila (1920-23) and then Senator (1923-25). Thereafter he returned to business as Chairman of San Miguel Brewery and Philippine Iron Mines, Vice President of Philippine Long Distance Telephone and El Hogar, and Director of Manila Yellow Taxi Cab, the Chamber of Commerce and the Chamber of Mines among others (Cornejo's CW Directory of the Philippines).

Maritima ships near the mouth of the Pasig: CEBU and SORSOGON in 1931, PANAY and NEGROS in 1932, updated PANAY with MACTAN in 1939 (USNA).

After Jose died in 1939, Ramon took full control of Fernandez Hermanos and Cia Maritima. By 1941 on the eve of the Pacific War, Fernandez Hermanos on behalf of Cia Maritima and themselves operated a fleet of fourteen vessels, together almost 23,900 gross tons. Except for the 5,236-grt tanker *Mindanao*, the vessels were all interisland passenger/cargo vessels. Average size was around 1,700 grt (inc. *Mindanao*) and average age almost 40 years, the oldest vessels being *Leyte* (1879), *Islas Filipinas* (1886), *Romblon* (1889), *Masbate* (1895), *Samal* (1897) and *Mactan* (1899). Only *Leyte ex Romulus*, however, had been a unit of the original Maritima fleet.

Yet despite the age of the fleet, the ships had been well maintained, most rebuilt or refitted, and were well suited to their various roles, even if other owners had newer, faster and more luxurious vessels, though Maritima's triple-screw former cross-Channel steamer *Corregidor ex Engadine* (1911) was exceptional with a 4½-day roundtrip between Manila, Iloilo, Cebu and Surigao and *Negros ex Friuli ex Prinz Hohenlohe* (1908) was also a fine 16-knot vessel. A year later it hardly mattered because with very few exceptions the entire Philippines fleet was lost during or after the Japanese invasion. Of Maritima's 13 vessels, only *Mactan* survived, being the only one to escape to Australia and spending the rest of the war on a buoy in Sydney Harbour.

Notable is that no less than six ships in this list, one new and five purchased over the years, had been constructed by Gourlay Bros. & Co. of Dundee, a yard with an excellent reputation but which built only 230 vessels before succumbing to bankruptcy in 1908. On the death of engineer Gershom Gourlay in 1902, it was said that 'the town's status in shipbuilding owed more to him than any other individual'.

The Cia Maritima fleet was revived after the war by Ramon Fernandez (see adjacent postwar fleet list by Stephen Kentwell). He had no children by his wife Felisa Hocson and died in Manila on 10 November 1964. The company acquired no ships after 1980 and ceased operations by 1985. Background on Maritima and interisland shipping in the colonial and post-colonial eras can be found in Dick & Rimmer, *Cities, Transport and Communications: The Integration of Southeast Asia since 1850* (Palgrave, 2003), pp. 100-06.

FLEET LIST

This Maritima/Fernandez list is extracted and enhanced from a larger database that was begun some thirty years ago with assistance from Bill Schell and materials in the USNA, Library of Congress and the Peabody Museum at Salem. The entries have been cross-checked against the Schell registers but in many cases include further detail. Many gaps remain, especially losses in 1941/42. Corrections and additional information from readers would be welcomed.

Photos. *There are few good complete and identified photos of Philippine interisland ships in the 19th and early 20th centuries. Several ship portraits exist in the collection of University of Michigan but we have had to rely heavily on often tentative identifications of ships in dated aerial photographs of the lower Pasig River now held in the U.S. National Archives (USNA) and sensibly presented at maximum quality with other photos by John Tewell on Flickr, and on vessels that appear in postcard scenes. Many identifications of early vessels are therefore by deduction and where tentative are indicated by a question mark. Advice and photographic contributions from readers would be welcomed.*
